About Us

Praxis i-Technologies is a first generation entrepreneurship venture, involved in providing technology and data solutions to customers spread across the world. Praxis is headed by a team of enterprising and well experienced individuals. The dedication and confidence of the team combined with individual expertise and experience in the information technology domain and other functional areas form the core strengths of the organization.

The focus is on analysis and mapping the business processes and develop customised applications/ERP products to meet client specific needs. Our functional consultants work with wide spectrum of domains and verticals, talk the business language of the clients, e.g., Pharma, Construction, Manufacturing, Healthcare, etc.

Our idea is focused on technology solutions that deliver cost-effective results. If a new system does not bring a tangible return on investment, provide operational efficiencies, improve customer service, or resolve compliance issues; it is not a productive use of time, money and energy.

Our strength lies in understanding the pains, problems and challenges facing distributors and manufacturers. We provide down-to-earth solutions that make a difference. We welcome the opportunity to explore the ways a technology solution can most successfully benefit your organization.

FUNCTIONALITY THAT CAN **connect** EVERY CORNER OF YOUR BUSINESS

Microsoft Business Solutions Axapta has more functionality than any other mid-wicket solution. Everything is installed right from the start, but you only pay for what you use. When you need more, it's ready and waiting for you to click it on.
